Did you know?
Fairmount is the largest arboretum in Colorado, with more than 74 species of trees.

We’ve given you an introductory 29 species that can be found on the Fairmount grounds. Take pictures and remember to share your favorites with us on Instagram or Facebook. Be sure to tag @FairmountDenver and we may feature your picture on our social media pages.

Below are 29 different tree varieties that can be found along the Trail of Trees self-guided tour along with the marked post at which you can find them.
